

Hello Fellow Duluth Resident,

**Do you value being comfortable in your home?** Do you enjoy keeping your home warm in the winter? We northern Minnesotans experience a wide range of temperatures throughout the winter. It's well known how expensive your furnace or boiler can be on your utility bill. It isn't as well-known how a regular annual tune-up and inspection can save you money both in the short AND the long term.

As the year passes, dust and other particles build up inside your furnace or boiler, creating a layer that insulates against heat transfer – meaning you pay for lost heat, and your machine works harder, shortening its lifespan.

We at **Summit Mechanical** are offering a new fall promotion to keep your unit healthy and your home comfortable. We are offering a thorough, high quality **clean and tune-up inspection on your home's primary heating unit for a promotional flat fee of \$79** (normally valued at \$150!). Any additional units - such as a backup heating unit, air exchangers, dehumidifiers, or water heaters - in need of tune-ups on that same visit are only an additional \$59 each – a deal within a deal!

You can expect **immediate as well as long-term cost savings**. Also, you can expect to **maintain system reliability**, because if a problem occurs on a checked unit in the first 2 months of its operation, we will come back out without a trip fee and give you a **diagnosis for free!** Also, getting your annual tune-ups done with us puts you onto our Preferred Customer list, in which you will receive **discounted repairs and pay no overtime fee for afterhours work!**

### **SUMMARY OF WHAT WE OFFER**

- **CLEAN AND TUNE-UP OF YOUR PRIMARY HEATING UNIT FOR A FLAT FEE OF \$79**
- **FREE DIAGNOSIS IF A PROBLEM OCCURS IN THE NEXT 2 MONTHS OF USE**
- **AUTOMATIC ENTRY TO THE PREFERRED CUSTOMER LIST AND ALL OF ITS DISCOUNTS**

If you haven't had your tune up done yet this season, give us a call to schedule a time at your convenience. Then just have a check, credit, or cash for ready for the technician once the work is complete.
